Special protective equipment and precautions for fire-fighters

Wear self-contained breathing apparatus (pressure demand, MSHA/NIOSH approved or equivalent) and full protective gear.

Move undamaged containers from immediate hazard area if it can be done safely, or use water spray jet to protect personnel and to cool endangered containers.

Combustion of this product will produce dense black smoke. Exposure to decomposition products may be a health hazard. If decomposition products released in a fire are inhaled, symptoms may be delayed. Exposed persons may need to be kept under medical surveillance for at least 48 hours.

Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment, and emergency procedures

Wear personal protection equipment.

Remove persons to safety.

See protective measures under point 7 and 8.

Methods and materials for containment and cleaning up

For containment:

Contain spillage with commercially available chemical berms and absorbant pads.

For cleaning up:

Practice good industrial hygiene when handling this product. Use appropriate personal protective equipment. Evacuate spill area and ventilate properly.

Absorb spill with inert material (e.g. dry sand or earth), then place in a chemical waste container. Avoid runoff into storm sewers and ditches which lead to waterways.

7. HANDLING AND STORAGE

Precautions for safe handling

Always use appropriate personal protective equipment (PPE). Avoid all contact with eyes, mouth, skin, and clothing. Avoid breathing vapors and mists.

Advice on general occupational hygiene:

Practice good industrial hygiene when handling this product.

Do not eat, drink or smoke when using this product.

Safety Data Sheet (HazCom 2012) CS-3213 Part A Class A-1/2

Keep away from unguarded flame, sparks, and heat sources. Avoid direct exposure to sunlight.
Keep away from food, drink and feed.
Incompatible materials:
None in particular.
Instructions as regards storage premises:
Keep away from heat, sparks, and flame. Keep container closed when not in use. Store in a cool, dry area at a temperature between 50 and 95 degrees F. Do not store outside in direct sunlight.

Store at ambient temperature.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

tetramethylthiuram disulphide - CAS: 137-26-8
- OEL Type: ACGIH - TWA: 5 mg/m³ - Notes: Inhalable fraction and vapor
- OEL Type: NIOSH - TWA: 0.05 mg/m³
- OEL Type: OSHA PEL - TWA: 5 mg/m³

DNEL Exposure Limit Values

N.A.

PNEC Exposure Limit Values

N.A.

Appropriate engineering controls:

Ensure good general ventilation. Local exhaust ventilation may be necessary to control any air contaminants to within their TLVs during the use of this product. Use explosion-proof ventilation equipment. Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower.

Individual protection measures

Eye protection:

Wear safety glasses with side shields (or goggles) and a face shield.

Protection for skin:

Use clothing that provides comprehensive protection to the skin, e.g. cotton, rubber, PVC or viton.

Protection for hands:

Use protective gloves that provides comprehensive protection, e.g. P.V.C., neoprene or rubber.

Respiratory protection:

Always follow all local, state, and federal laws regarding the use of respirators. A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection. A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use. Wear a MSHA/NIOSH approved (or equivalent) full-facepiece airline respirator in the positive pressure mode with emergency escape provisions. Always follow all local, state, and federal laws and regulations regarding the use of respirators.

Thermal Hazards:

Keep away from heat and sources of ignition
